# VIAVI

## Optical Power Meter (mOPM-C1)

MAP Series InGaAs Optical Power meter

The Multiple Application Platform (MAP) Optical Power Meter module (mOPM-C1) is a third-generation power meter that brings a range of panel-mount and remote-head configurations to the VIAVI Solutions MAP series.

The MAP Optical Power Meter (mOPM-C1) module extends the optical power measurement capability of the MAP series by offering four grades of optical performance in panel-mount or remote-head configurations with 1, 2, or 4 inputs per module. Designed with 4 unique performance ranges, versions are available for all applications. Models with 110dBm dynamic range are complimented by versions that support 26dBm input power.

The mOPM can be used for numerous applications such as measuring DUT settling time, cross talk, rise and fall times. It can also be used to measure synchronization and insertion loss stability. Also, allows for performance comparison (for example, comparing sequential switching to random switching).

## Functional Description

All four performance grades are based on indium gallium arsenide (InGaAs) detectors and are suitable for applications using single-mode (SM) or multimode (MM) fiber. The response of the detector varies with the wavelength of the incident light. All versions feature high accuracy, high linearity, and extremely low polarization dependent loss (PDL). The high- and ultra-high-performance grades feature enhanced thermal stabilization. This enhances the wavelength range, enabling 90 dB dynamic range for the high-performance grade and 110 dB dynamic range for the ultra-high-performance grade. The high-power grade extends high-power measurement capability to +27 dBm.

## Features and Benefits

- Panel-mount or remote-head configuration

- Single-, dual-, or quad-channel configurations available

- 250 kHz sampling rate for high-speed applications

- 750 to 1700 nm operating wavelength range

- 110 dB dynamic range and high-power options

- Compatible with single-mode and multimode fiber

- Ability to store up to 100,000 data points per channel

## Applications

- Amplifier characterization

- Receiver and transmitter testing

- Absolute power measurement

- Optical switching time measurement

## Compliance

- CE, CSA/UL/IEC61010–1, and LXI Class C requirements (when installed in a MAP chassis)

The mOPM uses detectors with intrinsically low uncertainty due to polarization: <± 0.01 dB for the Premium-Performance and <± 0.015 dB for the General-Purpose detector options. This helps maintain high repeatability in power measurements, virtually independent of the launch polarization of the light entering the detector. In general uncertainty due to polarization is less of a concern for high power measurement applications. Due to the filter element employed for the High-Power detector option, this value is <± 0.07 dB.

An intuitive  graphic user interface (GUI) is optimized for use in either a laboratory or a manufacturing environment.

Efficient transition between summary and detailed views (figure 1 and figure 2) allow users to operate at a system level or access the full power of a module.

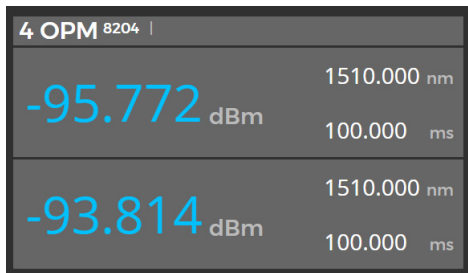

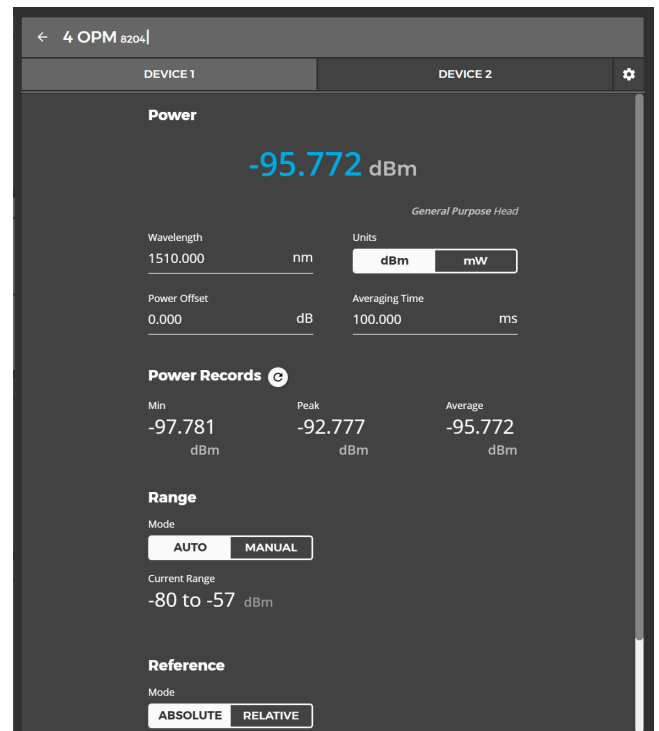

Figure 1 – mOPM MAP-300 summary view GUI

Figure 2 - mOPM MAP-300 detailed view GUI

## Options and Configurations

The mOPM-C1 is available in four detector types in 1,2 or 4 detectors per cassette. It is also offered in cassette mounted or remote detector option.

| | Options | Description |
|---|---|---|
| **Detector type** | 2mm InGaAs General Purpose | · Measures power levels from -70 to +11 dBm over the wavelength range of 800 to 1650 nm.<br>· Features high accuracy, very linear behavior and low relative uncertainty due to polarization. |
| | 3mm InGaAs Premium performance | · Measures power levels from -80 to +11 dBm over the wavelength range of 750 to 1700 nm.<br>· Features high accuracy, very linear behavior and extremely low relative uncertainty due to polarization. |
| | 3mm InGaAs Ultra performance | · Measures power levels from -110 to +11 dBm over the wavelength range of 750 to 1700 nm.<br>· In addition to the features of the Premium Performance detector, the Ultra Performance detector offers excellent stability for long term measurement of extremely low optical power levels.<br>· Only available as a panel mount. |
| | Filtered 2mm InGaAs High power | · Measures power levels from -45 to +27 dBm over the wavelength range of 800 to 1650 nm.<br>· Features high accuracy as well as very linear behavior. |
| **Flexible Detector Configuration** | Cassette-mounted | · Detectors mounted directly on the cassette faceplate.<br>· Configuration, the density available is 1, 2 or 4 detectors per single width cassette.<br>· Must configure with identical detector type. |
| | Remote detector | · With electrical connectors to which remote detector heads can be attached.<br>· Configuration, the density available is 1, 2 or 4 detectors per single width cassette.<br>· Flexibility with remote heads to mix detector types. |

The interface module is compatible with all performance grades of remote heads and can accommodate a mix of performance grades. For example, an application requiring a general-purpose optical power measurement (OPM) and a high-power OPM could be connected to the same remote head base module, thereby reducing the number of slots used in the MAP chassis.

## Super Application: OPMscope

The OPMscope is a super application designed for use with the mOPM-C1 line of power meters on the MAP-200 platform. This software feature is an intuitive tool geared for designers and allows graphical representation of optical signals, much like a digital sampling scope, but in the optical domain. This tool can be used to trigger on rising or falling edges, with the ability to see history using pre-trigger data points. It lets users pan and zoom to see details and monitor transients and exports up to 100,000 captured data for extended analysis from up to four optical heads simultaneously.

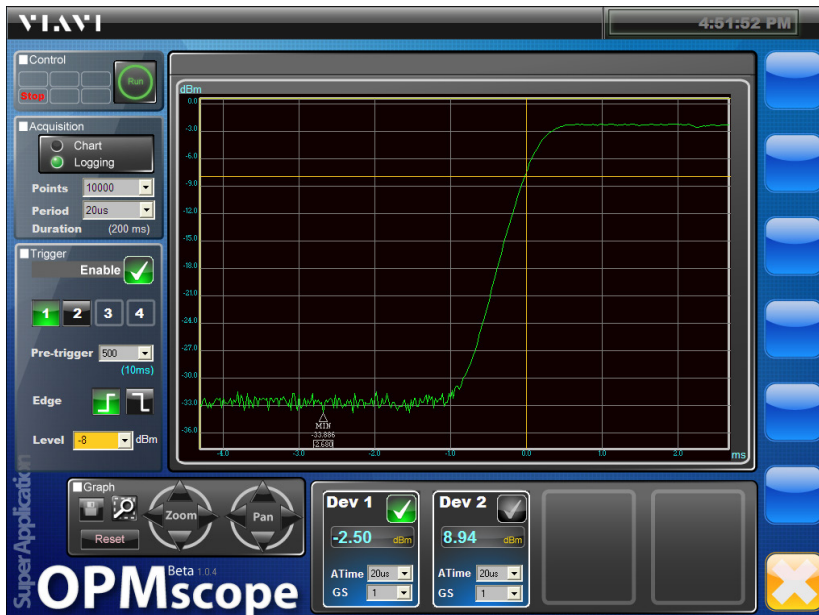

## Chassis and Modular Family

The VIAVI Multiple Application Platform (MAP) is a modular, rack mountable or benchtop, optical test and measurement platform with chassis' that can host 2, 3 or 8 application modules. The LightDirect family of modules are characterized by their simple control and single function nature. Individually or together they form the foundation of a diverse array of optical test applications. The web enabled multiuser interface is simple and intuitive. LXI compliant with a full suite of SCPI based automation drivers and PC based management tools, the VIAVI MAP is optimized for both the lab to manufacturing environments.

The mOPM is part of the LightDirect module family. Alongside the many other modules, such as light sources, polarization scramblers, variable optical attenuators, and spectrum analyzers, the MAP series is the ideal, modular platform for photonic system and module testing.

The mOPM is compatible with all current MAP-300 and MAP-200 chassis.

# Specifications

| Buffer size | 100,000 points | | | |
| Supported connectors[7] | FC, ST, LC, E2000, MU, MTP or bare fiber | | | |
| Recalibration period | 1 year | | | |
| Warm-up time | 30 min | | | |
| Operating temperature | 5 to 40°C | 5 to 40°C | 5 to 33°C | 5 to 40°C |
| Humidity | 15 – 80% relative humidity, non-condensing | | | |
| **Module** | | | | |
| Dimensions (W x H x D) | 4.06 x 13.26 x 37.03 cm (1.6 x 5.22 x 14.58 in) | | | |
| Weight | 1.2 kg (2.65 lb) | | | |
| **Remote Head** | | | | |
| Cable length | 1.4 m (4.5 ft) | | | |
| Dimensions | 13.8 cm x 5 cm x 5 cm (5.4 in x 2 in x 2 in) excluding cable | | | |
| Weight | 0.6 kg (1.3 lb) | | | |

[1]For 62.5 µm core fiber, additional uncertainty of 1% (PC) or 2% (APC) must be added due to overfill of 2 mm detector.
[2]Fiber SMF-28, T= 23 ±5°C, spectral width of source <6 nm, optical power on detector = -20 dBm.
[3]SMF 28, N/A of fiber ≤0.27, temperature, humidity, and power range per table.
[4]1 second averaging time, 300 consecutive measurements (300s), T = 23 ±5°C.
[5]All states of polarization, constant power, straight connector, T = 23 ±5°C WL = 1550 nm ±30 nm, MPMHP at WL = 1310 nm.
[6]For 900 – 960 nm only, uncertainty indicated is for 15 – 35°C.
[7]Note that MT connector size prevents the use of adjacent channels. Therefore, a 4-channel cassette only allows 2 MT input at a time.

# Ordering Information

| Description | Part Number |
|---|---|
| **Panel-Mount Sensor Option** | |
| Single channel | MOPM-C1PMH1-MPMxxxx |
| Dual channel | MOPM-C1PMH1-MPMxxxx |
| Quad channel | MOPM-C1PMH1-MPMxxxx |
| **Remote Head Base Cassette** | |
| Single channel remote interface cassette | MOPM-C1RH1 |
| Dual channel remote interface cassette | MOPM-C1RH2 |
| Quad channel remote interface cassette | MOPM-C1RH4 |
| **Remote Head Option** | |
| 2mm InGaAs general purpose head cassette | MOPM-C1RHGP |
| 2mm InGaAs high power remote head | MOPM-C1RHHP |
| 2mm InGaAs PCT system remote head | MOPM-C1RHPCT |
| 3mm InGaAs Premium purpose remote head | MOPM-C1RHPP |
| **Applications** | |
| Optical scope licensed super application for MOPM-B1 power meters | MSUP-OPMSCOPE |

# Sample Configurations for Panel Mount

| Type of Detector | Single Channel | Dual Channel | Quad Channel |
|---|---|---|---|
| **General Purpose** | MOPM-C1PMH MPMGPx1 | MOPM-C1PMH MPMGPx2 | MOPM-C1PMH MPMGPx4 |
| **High Power** | MOPM-C1PMH MPMHPx1 | MOPM-C1PMH MPMHPx2 | MOPM-C1PMH MPMHPx4 |
| **Premium Performance** | MOPM-C1PMH MPMPPx1 | MOPM-C1PMH MPMPPx2 | MOPM-C1PMH MPMPPx4 |
| **Ultra Performance** | MOPM-C1PMH MPMPPx1 | MOPM-C1PMH MPMPPx2 | MOPM-C1PMH MPMPPx4 |

## Accessories

| Accessories (Optional) | Product and description | |
|---|---|---|
| **Inspection and cleaning tool** | CleanBlast | The patented VIAVI Solutions® CleanBlast fiber end-face cleaning system provides a fast, effective, and cost-efficient solution for removing dirt and debris from connectors in most common applications. It is available in a benchtop and portable version |
| | FiberChek probe microscope | One-button FiberChek Probe delivers a reliable, fully autonomous, handheld inspection solution for every fiber technician. |
| | P5000i fiber microscope | Automated Fiber Inspection & Analysis Probe provides PASS/FAIL capability to PC, laptops, mobile devices and VIAVI test solutions. |
| **Replacement Parts** | Mating sleeves | AC500;FC/PC-FC/PC Universal Connector Adapter |
| | | AC501;FC/PC-SC/PC Universal Connector Adapter |
| | | AC502;FC/APC-FC/APC Universal Connector Adapter |
| | | AC503;FC/APC-SC/APC Universal Connector Adapter |
| **Detector adaptor** | A complete range of single ferrule, duplex, and bare fiber power meter adaptor are available at VIAVI. Refer to the AC adaptor selection guide for more information. | |

A wider range of inspection tools are available at VIAVI. More information about the products and accessories can be accessed through our website at www.viavisolutions.com. For further assistance please contact your local VIAVI account manager or VIAVI directly at 1-844-GO-VIAVI (1-844-468-4284) or to reach the VIAVI office nearest you, visit viavisolutions.com/contacts.
