VT869

6U Ruggedized MicroTCA Chassis, 12 AMCs

VT869

Key Features

- MTCA System Platform 19” x 6U x 13.62” deep (20.32” deep with handles and sliding rails)
- Full redundancy with dual MicroTCA Carrier Hub (MCH), dual Cooling Units and dual Power Modules
- Up to 12 AMCs: six full-size and six mid-size or 10 full-size AMCs
- Dual star topology
- Meets MIL-STD-810G Ref. 12 Method 516
- Meets MIL-STD-416F Ref 18
- Front to back cooling

Benefits

- Dual (one for each power module) integrated EMC and transient filters for the system to comply with MIL-STD-1275D, DO-160E and/or MIL-STD-461F
- Dual replaceable fan trays are incorporated to provide front-to-back air cooling.
- Replaceable air dust filter
- Alarm and activity LED indicators in the front.
- Heavy duty sliding rails designed for 19” rack mount capability.

µTCA®

VT869

The VT869 is a 6U MTCA chassis that provides six full-size and six mid-size AMC slots that can accept any AMC.1, AMC.2, AMC.3 and/or AMC.4.

The chassis has a choice of two backplane configurations. Either 12 slots (6 full-size and 6 mid-size) or 10 slots (10 full-size). Each AMC slots receives 5 clocks (FCLKA, TCLKA, TCLKB, TCLKC and TCLKD). For other backplane configurations please contact VadaTech Sales.

The VT869 has full redundancy. It's capable of having redundant MCH, Power Modules, as well as redundant Cooling Units for high availability.

Figure 1: VT869 with Top Cover

Architecture

The VT869 outer casing is produced from machined aluminum and incorporates joints specifically designed to minimize EMI leakage.

All Front Panel/AMC Module attachment cables are secured by ties to a central cable guide rail (Figure 2). During lower fan tray and/or module(s) replacement, remove the cable guide rail (thumb screws) to loosen the internal cable/connector harness.

Heavy duty sliding rails, (MiSuMi p/n SSRRH3645), are used to fix the chassis to a 19" cabinet. The selected rails are made of stainless steel with dual lines of linear ball bearings. A pair of these rails can take a load of approximately 100 kg.

Figure 2: VT869 Chassis Top View without Cover

Power Supplies

The VT869 has two Power Modules slots to accept standard MicroTCA power modules.

Cooling and Temperature Sensors

The VT869 has dual intelligent Cooling Units. This redundancy allows fail-safe operation in case one of the cooling units becomes non-operational. The cooling airflow is from front to back (Figure 3). The removable Air Filter has a switch to detect its presence and can be monitored for when it needs to be replaced.

12 chassis mounted temperature sensors monitor the intake and the outtake air temperature throughout the unit.

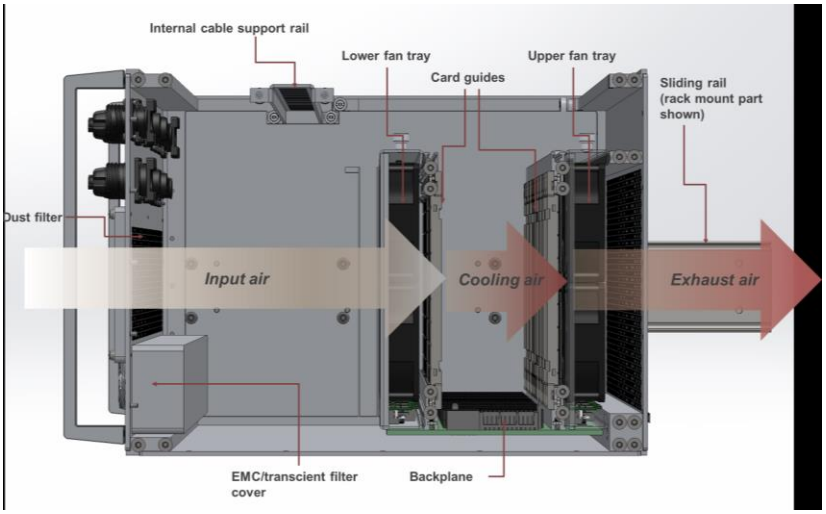

Figure 3: VT869 Airflow

Telco Alarm

The VT869 is fitted with a Telco alarm that constantly monitors the chassis for any anomalies and alert the user by LED indication on the Front Panel.

FRU Information and Carrier Locator

The VT869 has FRU information and a Carrier Locator. The Carrier Locator is assigned by mechanical dip switches which are easily accessible via the front panel. The MCH reads the Locator via its private I2C bus.

No Active Components

Unlike other MTCA chassis on the market, the VT869 has no active components on its back plane, making maintenance and servicing tasks more straightforward.

Scorpionware™ Software

VadaTech's Scorpionware software can be used to access information about the current state of the Shelf or the Carrier, obtain information such as the FRU population, or monitor alarms, power management, current sensor values, and the overall health of the Shelf. The software GUI is very powerful, providing a Virtual Carrier and FRU construct for a simple, effective interface.

Specifications

Architecture		
Physical	**Dimensions**	Height: 6U
		Width: 19”
		Depth 13.62” deep (20.32” deep with handles and sliding rails)
Type	**MTCA Chassis**	12 AMC.0: 6 Mid-size and 6 Full-size slots or 10 Full-size
Standards		
AMC	**Type**	AMC.0, AMC.1, AMC.2, AMC.3 and AMC.4
MTCA	**Type**	PICMG 3.0 Rev 2.0
Module Management	**IPMI**	v2.0
Configuration		
Power	**VT869**	Power Module dependent
		DC Input from 18-36V, 10-36V or -36 to -75V (Power Module dependent)
Environmental	**Temperature**	See Ordering Options
		Storage Temperature: –40° to +85°C
	Altitude	10,000 ft operating
		40,000 ft non-operating
	Vibration	MIL-STD-810G Ref. 12 Method 516
	Shock	MIL-STD 810G Ref. 12 Method 516
	Relative Humidity	5 to 95% non-condensing
Front Panel	**Interface Connectors**	Contact Sales
	LEDs	IPMI and Telco Alarms
Software Support	**Operating System**	Agnostic
Other		
MTBF	MIL Hand book 217-F@ TBD hrs	
Certifications	Designed to meet FCC, CE and UL certifications, where applicable	
Standards	VadaTech is certified to both the ISO9001:2000 and AS9100B:2004 standards	
Warranty	One (1) year, see VadaTech Terms and Conditions	

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders

- First-to-market silicon
- Constant innovation
- Open systems expertise

We commit to our customers

- Partnerships power innovation
- Collaborative approach
- Mutual success

We deliver complexity

- Complete signal chain
- System management
- Configurable solutions

We manufacture in-house

- Agile production
- Accelerated deployment
- AS9100 accredited
